Cookbook

The cookbook also contains six recipes for dishes made using conventional modes instead of the Auto Recipe Mode.

Auto Recipe List

A simple, water-resistant recipe list is also provided. You can leave it next to the rice cooker for easy checking of recipe numbers.

IH Technology

The most advanced heating technology for rice cookers

The induction heating (IH) produces magnetic forces that generate heat in the pot itself to yield rice that’s fluffy and has a uniform texture and delicious taste.

Inverter Technology

Inverter control enables fine adjustment of heating power for delicious results

With Inverter technology, IH rice cooker heating can be controlled much more precisely than conventional microcomputer types, making it ideal for delicious cooking result. When the rice is soaking, it is kept at the optimum temperature to efficiently absorb water. And the cooker is able to start cooking rice with high efficiency and high 1,300W heating power immediately after the optimum soaking time.
**Multiple Cooking Mode**

Different modes and water level indications ensure the best results with the type of rice you’re cooking.

**击15 Cooking Modes**

- Steam Basket
- Steam Tray
- Removable Inner Lid
- 3.6mm Thick Iron Pot
- Reheat
- Timer

**Rapid Eco Course**

The combination of Hitachi’s IH and Inverter technology enables rapid cooking that yields delicious rice with just the right texture, all while reducing energy use.

Microcomputer Controlled Heating
Thorough Soaking and Steaming for Delicious Results
Microcomputer controlled rice cookers ensure the exact temperature at different stages of rice cooking. Rice is first allowed to absorb water at a moderate temperature before the water is fully heated to boiling point. And once the rice is cooked, excess water is purged from it and the cooker switches to a special steaming process. The final result is deliciously cooked rice, kept warm until you’re ready to serve it.

Enjoy Delicious Fluffy Rice with the 3.0mm Thick Black Pot
The bottom of the pot features convection ridges that increase heat convection to cook rice evenly and delicious.
*Applies to the RZ-D18WFY, D10WFY, D18VFY and D10VFY.

Convection Ridges

- Non-stick Material Coating
  Rice doesn’t easily stick, so it’s easy to clean.
- Reinforced Aluminum Layers
  The aluminum has been strengthened for improved durability.
- Aluminum Alloy
  Efficiently conducts heat.
- Metallic Black Coating
  Rapidly absorbs radiation heat from the heater.
